GlobalizeMe UK Ltd, Sanderum House, Oakley Road, Chinnor, Oxfordshire, OX39 4TW, UK

Role: DevOps Team Lead

Location:	Bangalore India
Basis / Salary:	Full time / Commensurate with experience

STRICTLY NO AGENCIES   **Vacancy Date: 1st August 2020**

We are seeking an experienced DevOps Team Lead to work within our digital support team and help us drive our business forward whilst maintaining our already strong processes, technical foundations, and client relationships.

About GlobalizeMe

Headquartered in the Netherlands and with regional offices in the UK and India, we are a growing company with a massive reach. From small beginnings, GlobalizeMe have shown conservative yet steady growth throughout this early part of the 2000's. Our focus has always been on honesty in tandem with happy teams and happy clients, as evidenced by our company ethics.

This ethos has driven some exciting milestones in our history and has seen us provide services to a range of clients from global tech companies and financial services giants to pharma leaders and SMEs alike. Read more about our history and ethos here: http://www.globalizeme.com.

About the Role

This role is a great opportunity for an enthusiastic experienced DevOps engineer to progress their career goals being a key player within this diverse and entrepreneurial team.

Your key responsibility will be to provide first class support working within our DevOps team taking ownership of customer installations, regular maintenance, upgrades, and support tasks. You will be expected to have high service standards and provide a 'yes we can' approach at all times. We would also expect you to be of a skill and experience level to mentor more junior members of the existing team and to even grow a team around you in the coming years.

You can be based remotely or within commutable distance of our Bangalore office.

The role is generally 9-5 during the UK day in nature, however there will be the requirement for some out of hours / weekend support for which time off in lieu or financial recompense will be arranged.

About You

Working at GlobalizeMe is not your normal 9-5. We work hard, and in exchange, all the GlobalizeMe team work to flexible working rosters that support our strong and professional business ethics but also give priority to family where needed. You will be ready for a flexible working environment and will have the following skills / qualities:

Essential Skills

Linux
Linux OS specifically Amazon Linux, Centos and Ubuntu

Apache
Apache including vhost & proxy configuration and .htaccess rules
Threads / Process optimisation

Puppet
Puppet configuring servers using modules and hiera data
Management of environments using r10k
Ability to write/debug puppet modules would be an advantage

AWS SPECIFIC
Working knowledge of AWS environment
All based AWS products such as EC2 instances, S3 buckets, Route53, Elastic Beanstalk, Elastic Container Service, etc
Load Balancers classic and application, defining rules for application load balancers
VPC networking/internet & NAT gateways, Subnets
Security Groups/WAF
Provisioning of servers using CloudFormation Templates or userdata
AutoScaling
Ability to work with and create Cloud Formation templates in YAML format

SECURITY
A general working knowledge of IT and internet security required, including OWASP protocols and penetration testing cycles, vulnerability testing (using manual and automated methods) and remediation.

PHP
PHP configuration and optimisation
Knowledge of PHP useful to assist in debugging
Shared session handling in multi-server environments

MYSQL
MYSQL/Aurora configuration
Ability to debug and optimise queries and indexes

Docker
Knowledge of Docker, ability to control and manage containers plus creation of Docker files

Code Control & Build
Ability to work with git and understand the git flow method of working
Ability to work with Jenkins and configure/create Jenkins build scripts

AWS Accreditations
You should be accredited to at least AWS Cloud Practitioner level and be ready to take your AWS Certified DevOps Architect exams within a month of joining the team.

Desirable Skills
The following skills / accreditations would be either desirable in a candidate or will be skills that the candidate would be able to aspire to in a short space of time:

- Accreditations
  - AWS Certified DevOps Architect (Associated)

- Zabbix
  - Knowledge of working with Zabbix is desirable
- Programming Languages
  - Knowledge of python and ruby is desirable
- Soft Skills
  - Proven experience in team leadership or team mentoring is desirable
  - Proven experience in team growth and recruitment is desirable

General / Soft Skills

- You have commercial experience in an Infrastructure / Technical Support position.
- You will have excellent written and spoken English skills and confident to attend regular internal and client calls.
- A versatile self-starter with a proactive mindset and a desire to take ownership of projects and tasks seeing them through to completion.
- You will understand and be able to communicate to a high level with colleagues, clients and other business stakeholders.

And equally important are the following:

- You'll have a sense of humour and will be ready to meet challenges and clients with a smile.
- You'll be setup and ready to work from home, following a UK shift pattern.
- You'll be ready to meet the challenge of joining a small yet dynamic and rapidly growing team with some tough yet rewarding challenges in meeting the needs of our global, high-calibre clients.
- But above all you will be passionate to know that you'll be helping the company grow to exciting levels and will be growing with the company.
